

Become a health professional with pre-health advising

If you want to pursue health professional school after graduation, the College of Liberal Arts and Sciences at Arizona State University has the pre-health advising and resources for you. We'll help you master the fundamental course requirements for a successful medical or dental career and conquer the competitive admission process.

From extraordinary advising to necessary health-related experience, you'll learn to thrive in our dynamic community of scholars as you prepare for a fulfilling career as a health professional.

Students admitted to U.S. medical schools come from all possible undergraduate majors, which allows you to choose an academic field in line with your passions. Our pre-health advising and resources will complement your area of study, no matter your major, and make sure you fulfill the curriculum requirements for health professional schools.

Whether you're majoring in physics, philosophy or global health, our advisors will assist you in translating your dreams into action.

Become a health professional; we're here to help.

Pursue a PRE-HEALTH pathway at ASU

ASU College of Liberal Arts and Sciences
Arizona State University

About our college

The pre-health advising is housed in the College of Liberal Arts and Sciences, the intellectual heart of the university. We foster educational excellence, intellectual inquiry, insightful discovery and unmatched access.

Our college has 89 undergraduate majors and 130+ graduate degrees housed in 22 interdisciplinary schools and departments spanning the humanities, natural sciences and social sciences. We encourage our students and faculty to think beyond traditional academic boundaries and pioneer solutions to society's most pressing issues.

No matter which of ASU's 300 majors you're pursuing, our pre-health advisors will help you prepare for admission to medical school.

Stride toward acceptance to medical school

The components of acceptance to a health professional school include rigorous academics, high admission test scores and meaningful health-related experience and exposure to the field. Our pre-health advisors can help you determine which courses satisfy requirements, navigate the complexities of admission and prepare for your required examinations.

While medical school admits come from all possible undergraduate majors, there are certain curriculum requirements including a year (with labs) of biology, general chemistry, organic chemistry, physics, mathematics and English. Depending on your intended area of specialty, these course requirements may vary.

Our pre-health advisors can also guide you in incorporating study abroad, research and internships to help strengthen your application to medical school.

What pre-health advising services are available?

- admission test assistance
- application preparation
- health-related experience

"Through the pre-professional advising office, I was able to build a well-rounded medical school application and gain acceptance to medical school. Thanks to the advice and skills gleaned from my time at ASU, I successfully matched at my #1 residency choice, Mayo Clinic Arizona."

— ASU alumnus Nathan, class of '11
