

Live the life you want

The College and its resources are designed to enable you to pursue your dreams, whether your dreams include groundbreaking research, creating a business, discovering solutions to community and global issues or something else entirely. You will graduate from The College as a master learner — an individual who can succeed no matter what obstacles you may face in life.

Discovering a passion for research

Biochemistry graduate Connor V. had his sights set on medical school early on. As a student in The College, he made the most of the resources available to him — working alongside faculty to improve early-detection testing methods for HIV, mentoring younger student researchers, and then as a Helios Scholar with the genomics research institute TGen, studying genetic codes of brain tumors. Connor will attend medical school this fall.

Empowering others through justice

During her time in The College, justice studies graduate Shantel M. co-founded the Little Dreamer's Foundation, providing preschool education for children from low-income families in Zimbabwe. Her passion for helping others earned her the prestigious 2019 Rhodes Scholarship. She will attend the University of Oxford in England and study jurisprudence.

Join a welcoming environment

The College of Liberal Arts and Sciences is the largest and most diverse college at ASU. Here, you'll be surrounded by students, scholars and faculty from all over the world. Having access to a wide array of experiences, skill sets, languages and cultures will allow you to develop important conversations and research, and prepare you for today's interconnected world.

Languages lead the way to dream career

With a goal of joining the U.S. Navy, Joseph C. initially attended The College as a science major — a path typical for midshipman. However, his interest in the humanities led him to graduate with a bachelor's degree in French, minors in Arabic and military leadership, and a certificate in Arabic studies, skills that will help him excel as a foreign area officer.
